

ENVIRONMENTAL POLICY

Our Group of companies provide civil infrastructure, engineering services and associated activities for private, public and resource sector clients, including:

- Road infrastructure including design, pavement construction and rehabilitation, asphalt and surfacing;
- Bulk earthworks, site clearing and demolition works;
- Residential and industrial subdivisions including site clearing, earthworks, roads and services;
- Civil infrastructure for buildings, utility providers and the resources sector;
- Storm water, sewer and water services including reticulation, treatment and pump stations;
- Cast in-situ concrete structures, retaining walls, bridge construction and large culvert installation; and
- An internal global positioning and survey division to manage engineering control and survey.

Our group is committed to:

- The protection of the environment including the prevention of pollution;
- To comply with legislation protecting any site, place, structure or material of cultural heritage significance;
- Meeting stakeholder's standards and expectations;
- Meeting compliance obligations placed upon the organisation;
- Continually improving the effectiveness of our IMS; and
- Satisfying applicable requirements of ISO 14001:2015.

Our Environmental Objective is to:

Control environmental factors that could impact to the detriment of the environment or on the organisation to the extent that ALLROADS can control or influence those factors.

WE ARE COMMITTED TO ACHIEVING EXCELLENCE IN ENVIRONMENTAL MANAGEMENT
